

Centurion LUX - Column Lift Table

An electric examination chair specifically designed for Plastic Surgery, Skin Treatments, Dermatology, Podiatry, General Examination or as a multi-modality procedure chair. The power-driven height adjustment provides greater access for elderly and incapacitated patients while also achieving an ergonomic working platform for the practitioner.

WHITE OR GREY SEMI-PU FABRIC

PRODUCT INFORMATION

ELECTRIC CONTROL SYSTEMS

The Lux has 1 column and 3 actuators, all of which can quickly be controlled through the handset controls. The Handset also features Lock and Reset controls for added safety and function.

RESET AND SAFETY LOCK BUTTONS

The Reset button automatically moves the chair into a seated position ideal for clients getting on or off. The safety lock feature ensures there will be no unexpected movement during treatments and can be used as an added safety lock when not in use.

RETRACTABLE WHEEL SYSTEM

The foot operated retractable wheel system allows for ease of maneuverability. This system is designed to move the bed into place without a patient on the bed. When not in use the wheels can be retracted to provide a stable and solid base.

FLIP BACK AND REMOVABLE ARMRESTS

The removable armrest allow better patient access when getting on and off the chair. The armrests adjust in unison with the seat, and when not needed can quickly be flipped back out of the way. The armrests can then be removed entirely if not in use.

IN-BUILT FOOT CONTROLS

The Centurion LUX has a in-built foot controller on both sides of the base. You can adjust the height, tilt angle and backrest with these controls. There is also a switch to adjust the angle of the footrest on the footrest section.

EXTENDABLE FOOTREST

The footrest can be extended to create a tabletop of 1950mm. Ideal ankle support for patients of diverse stature.

KEY SPECIFICATIONS
